Bachelor of Engineering

PROJECT DETAILS

1. Netflix Clone:

   A responsive UI built using HTML, CSS, and JavaScript. Mimics Netflix's interface with hover animations and image carousels. Built during GUVI Buildathon.

2. Local Service App:

   Connects users to nearby plumbers, electricians, and other services. Built as part of a college mini-project with mobile responsiveness and clean UI.

3. Handwritten Digit Recognition:

   Machine learning-based web app to identify digits using MNIST dataset and a deep learning model. Implemented with Python, TensorFlow, and a Flask web interface.

4. Smart Attendance System:

   A full-stack web application to manage college attendance period-wise. Built with Node.js, MongoDB, and custom frontend dashboard for faculty and students.
